

Elementary Two Revision Rotating Board game

Worksheet 1- Playing Board

Where things are in your partner's home	How to get to the nearest toilet	Things people in your partner's family often do	Things in or on your partner's desk (at home or at the office)	START Things in your partner's bag now
Things your partner's neighbours do				Things your partner would like to do
How your partner does different things				Things your partner has never done
Things your partner's family and friends are doing now				True comparative sentences between you and your partner
Your partner's plans				Questions a waiter asks
Things your partner is doing now that they don't usually do				Things that are the same between your house and your partner's house
How many things there are in the room (eyes closed!)				Your partner's last supermarket shopping
How often your partner does certain things				Past participles with the same vowel sounds as <u>more</u>

Different names for rooms in a house				Things your partner eats and drinks quite a lot of
Uncountable foods in your partner's kitchen				Countable foods in your partner's kitchen
Things in your partner's primary school	How to get to the nearest supermarket	How to get to your partner's house/ flat	Your partner's plans for next weekend	Different names for furniture

Elementary Revision Rotating Board game

Worksheet 2- Rules of the Game

Summary of the game

Players go round and round the board (anticlockwise), scoring one point for each complete circle. You move by the number of true sentences you make.

Detailed rules

You need one board for each group of two to four people, and one counter (for example a coin or an eraser) each.

When it is your turn, try to make as many true sentences as you can about the topic in the box your counter is on. After each sentence your partner(s) will tell you if the sentence is true or not. If your partners say one of your sentence(s) is false, stop speaking and move on one square for each correct sentence you said, for example:

Student A "To get to your office go out of this door"

Student B "That's right, one square"

A "Then turn left"

B "That's correct, two squares"

A "Then go up to the 7th floor"

B "Sorry, that's not right. My office is on the 8th floor. You can move 2 squares. Now it's my turn"

Play now passes to the next person.

When you reach the "Special Challenge" square, stop there until your next turn (you can never go straight past). When your turn comes again, your partners can ask you any question about a classmate, for example "How old is she?" If your answer is correct, you can move back to the "Start" square, score one point for a complete circle, and continue the game. If your answer is wrong you have to stay on the "Special Challenge" square until your next turn.

Continue playing until your teacher tells you to stop. The person who has the most points (has been around the board most times) is the winner.
