What are the most common university rules in your country and in other countries, e.g. the UK, USA and Australia?

Tick the ones above that are usually true in the UK, USA and Australia. Check your answers with your teacher, giving your answers as full sentences with "have to" and "don't have to" (If you don't know generally but know of someone's real experience, you can use "had to")

Imagine you are the management of a private university. You have to decide 10 rules for your university that will be popular both with students and their parents.

Take turns pretending to be a future student or parent of a future student and ask another group about their rules. Decide if you want to go or want your child to go to that university and tell the class why.
