Advanced body vocabulary
Cutting Edge Advanced Module 4

Choose one of the things below that you understand and explain which one you are thinking of ***without using any of the words in that box*** *until your partner guesses which one you are talking about.* ***No pointing or other gestures!***

When your teacher stops them, ask about any which you are not sure about, working together to explain them as a class each time.

Brainstorm other body parts not below.

Change groups. Do the same guessing game, but this time without the list below to help.

Advanced body vocabulary to explain and guess

shin	collar bone	shoulder blade	spine
eyebrow	eyelashes	pupil	iris
